POWEREDGE™

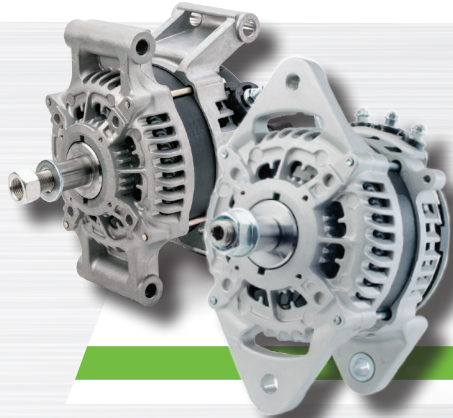

Top Selling PowerEdge Starter & Alternator Part Numbers

39PE Gear Reduction Starter Performance. Quality. Competitively Priced.

Did you know there are four PowerEdge 39PE starter part numbers that cover most Cummins, Caterpillar, and Detroit Diesel engines? Now fleets can consolidate their inventory and reduce the number of part numbers required for fleets maintaining a variety of engines! Plus, most have a rotatable flange allowing technicians to adjust the position of the starter to accommodate a wide variety of engines.

PowerEdge starters and alternators have a one-year, unlimited mile, no-hassle warranty.

24PE Pad and J180 Mount Alternators Dependable. Durable. Better Built.

Thanks to DENSO's innovative Segment Conductor® square wire design, the 170-amp PowerEdge Pad and J180 mount alternators provide more amps at idle than a standard alternator. This design also makes our units lighter and more compact for easier installation.

Part Number	Description	Price
282-0108	Cummins ISX, ISM, ISX15, CAT C13, C15 - CAT C9, C10, C11, C12, C13, C15 - Detroit Diesel Series 60 (S60), Mack E7	313.99

Visual Stroke Indicator

Haldex, the industry's first choice in Automatic Brake Adjusters, offers S-ABA with Visual Stroke Indicator.

Haldex is driven to innovate. But we know the best ideas are often the simplest ones.

Our **Visual Stroke Indicator** installs effortlessly, simplifies ABA first-fit, and is easy to read, helping fleets keep their brakes in compliance and their people and equipment operating safely.

- › Easy installation – no template required
- › Identifies correct adjuster installation
- › Indicates out-of-stroke condition
- › Bright and highly visible – technicians and drivers can confirm correct stroke at a glance

The best in S-ABA is now even better. Haldex S-ABA with Visual Stroke Indicator
